Dear Sir:-

A discussion has arisen in our office relative to the cap that is illustrated on the head of the "Goddess of Liberty' on most of the coins of the United States. On some of the quarters and half dollars and dimes it is represented on the end of a stick or staff: and, on the more recent coins, for instance 1895 dollars it is not much more than a cap simply to enclose the hair. Will you kindly inform me, or if not, tell me where I can get the following information:- When was the "Goddess of Liberty" first used by the United States, and what connection has the cap & cane and staff with the "Goddess of Liberty". Some of the coins of early days do not have this cap or cane represented with the "Goddess of Liberty". Your reply, will of course, be duly appreciated.

Yours very respectfully,

C. A. Brockett
